

Curve Data  
 Δ = 0°22' L  
 D = 0°04'  
 T = 275.02'  
 L = 550.00'  
 P.I. = Sta. 318 + 46.00

Note:  
 The Survey & as shown is also the line to which R.O.W. was acquired. There are many discrepancies in this area. It is apparent from a survey by Atwell-Hicks that the plats were also originally to this line. Their survey in 1960 shows the lot lines 30.78' southerly at Mansfield St. to 0.07' southerly at Wallace Blvd. The back lot lines remain stationary. Between lots 362 and 367, westerly of Mansfield St., the lots moved southerly in their entirety. There are also two curves on the ground where the road is actually south of our Survey & and appear to correspond with the road shown in dashed lines and agree with the Atwell-Hicks Surveys.

Proj. 81-8

Note:  
 Dimensions and Bearings shown are taken from several surveys in this area by Atwell-Hicks, Inc.  
 Other surveys by them west of this area to Hewitt Rd. indicate 50' R.O.W. where we have acquired none. See previous sheet.

Note:  
 Dimensions are shown in Morse's Add. per plat and as measured by Atwell-Hicks in their Survey. There are many variable differences in this area as to the exact location of centerlines and R.O.W. lines.

Note:  
 Lots and Streets in the Bartholemew's Add. are asked with dimensions given on plat. Apparently at right angles on plat and aerials.
