

**\*\*Contractor Announcement\*\***

**Project Quantity Sheet Report**

Beginning with projects being advertised for the October 6, 2017, bid letting, MDOT is changing the way project quantities per plan sheet are reported.

The Quantity Sheet Report that has been included in the proposal will be eliminated. In its place, a new Excel file (Project Quantity Sheet) will be placed in the RID documents.

The Project Quantity Sheet file will have the designation "Job Number \_ Quantity Summary Sheet \_date.xml" (e.g. 123456\_Quantity Summary Sheet\_2017-08-21.xml). Once the file is downloaded from the RID, the user will have the ability to manipulate the file if desired. Please note that if an addendum is issued that impacts project quantities, an updated Project Quantity Sheet file will be provided in the RID along with the addendum.
