

****CONTRACTOR ANNOUNCEMENT****

Upcoming MDOT e-Proposal Enhancement on December 6, 2022, at 12:00 p.m.

As part of a continuous effort to maximize user efficiency, MDOT will be upgrading the e-Proposal application to include a Letting search feature. The Search feature will be located directly under the Lettings pulldown menu on the main e-Proposal screen. This will allow users to perform searches on currently advertised (active) and previously advertised (inactive) lettings to find projects based on:

- Letting Date
- Contract ID (Control Section)
- Job Number
- County

The screenshot displays the user interface for searching lettings. On the left, there is a 'My Account' section with a link to 'Edit My Account'. Below it is a 'Lettings' dropdown menu with the text 'Select a Date' and a 'Search Lettings' button. To the right, the 'Search for Lettings' section contains four input fields: 'Letting Date' (a dropdown menu with 'Select a Date'), 'Contract Id' (a text input field), 'Job Number' (a text input field), and 'County' (a dropdown menu with 'County'). Below these fields is a 'Letting Selection' section with two radio buttons: 'Active' (selected) and 'Inactive'.

We are also working on improving the navigation refresh rate. More details to come on this enhancement.

For questions regarding MDOT e-Proposal, please email MDOT-eProposal@Michigan.gov. And for questions regarding MILogin account, please visit [MILogin Help](#).

Thank you,
