

Contractor Announcement

Automatic Publishing of Bids issue

Infotech is currently working to resolve the issue with the auto-publishing feature of the Apparent Bids, therefore the bid results will continue to be manually published following the conclusion of the letting.

Contractors are advised to revisit Apparent Bids on the Bid Express site, as the complete results will be posted as they become available. The "As-Submitted" results will be posted on the MDOT Bid Letting web site when available.

The process of manually publishing the bid results does take additional time. MDOT appreciates your continued patience during this process.
