Moderator	Response	Julie Townsend (TownsendJ@michigan.gov)	11/19/2020 18:18	Thank you. Its hard for me to go out and get links when I'm producing this session(Link to Geometric Design Guides: https://mdotjboss.state.mi.us/TSSD/getSubCategoryDocuments.htm?prjNumber=1403851&category=Geometrics&subCategory=Geometric%20Design%20Guides&subCategoryIndex=subcat1Geometrics&categoryPrjNumbers=1403850,1403851)
Attendee	Question	Anonymous (Unverified)	11/19/2020 18:43	can you please repeat the 300x 200 clear vision
Attendee	Question	Anonymous (Unverified)	11/19/2020 18:44	Where is the exhibit that shows ramp design speeds vs mainline design speeds? It was on a slide.
Attendee	Response	Anonymous (Unverified)	11/19/2020 18:48	AASHTO Green Book. Thanks!(Where is the exhibit that shows ramp design speeds vs mainline design speeds? It was on a slide.)
Moderator	Response	Mark Fisher (FISHERM@michigan.gov)	11/19/2020 18:51	2011 AASHTO Green Book Table 10-1 on page 10-89(Where is the exhibit that shows ramp design speeds vs mainline design speeds? It was on a slide.)

Attendee	Question	Anonymous (Unverified)	11/19/2020 19:04	Where is the Department in terms of looking at a combination of design vehicle and accomodated vehicle? Using WB-67 as a design vehicle creates large intersection radii which are not great for non-motorized users. Perhaps have the design vehicle as something smaller (say what 95% of AADT is) and accomodate the 5% larger commerical vehicles using aprons behind the curb rather than creating a large curb radii.
