

SPECIAL CONDITIONS FOR INSTALLATION AND MAINTENANCE OF SMALL CELL WIRELESS FACILITIES (SCWF) ON STATE TRUNKLINE HIGHWAYS

These special conditions apply to installing and maintaining SCWF on State Trunkline Highways. Permit applicants shall also comply with Michigan Compiled Laws (MCL) 460.1301 thru 460.1339. In addition to the required documents identified in the Guidelines for Installation and Maintenance of Small Cell Wireless Facilities on State Trunkline Highways, the following actions are required:

Advance Notice for Work

Use CPS to submit an Advance Notice for work in the Highway ROW, at least five (5) days prior to the proposed work.

Labeling

Label each SCWF with the name of the wireless provider, emergency contact telephone number, permit number, and the GPS coordinates.

Make-ready Work

Complete all make-ready work within 60 days.

SCWF Installation

Complete each SCWF installation within 1 year after a permit is granted. A wireless provider shall complete collocation of each small cell wireless facility, that is to be operational for use by a wireless services provider, unless the authority and the applicant agree to extend this period, or the delay is caused by the lack of commercial power or communications facilities at the site.

Completion Notice

Use CPS to submit a Completion Notice-after completing the installation of the SCWF.

Repair SCWF

Repair all SCWF, as required by MDOT. If a wireless provider fails to specifically repair a SCWF, as required by MDOT, and within 60 days after a written notice is sent by MDOT, MDOT *may* make those repairs and charge the wireless provider the reasonable, documented cost of the repairs.

Annual Permit

Annually, use MDOT's web-based Construction Permit System (CPS) to submit an application for an Annual Statewide Construction Permit and select "Small Cell Wireless Facility" as the work type.

Removal Notice

Submit a written notice to MDOT before discontinuing the use of a SCWF, utility pole, or wireless support structure. If a wireless provider fails to submit a written notice to MDOT, within 45 days after a written notice is sent by MDOT, MDOT *may* remove these items and charge the wireless provider the reasonable, documented cost of the removal.

Annual Costs

Annually ensure payment is made for the following documents:

Annual Permit**Fees (Rates)**

- \$125 for each new utility pole or support structure, or
- \$20 for each co-located SCWF
- \$30 additional rental rate-for each co-located SCWF on an existing MDOT pole

Bonding

- \$1,000 Individual ePerformance bond for each singular SCWF installation, or
- \$50,000 Blanket ePerformance bond for consolidated SCWF installations, and/or for Required Annual State-wide operations/maintenance permit.

Insurance

Maintain adequate insurance, for the duration of the installation and continuing use of the Right-of-Way. If an applicant is self-insured, an Indemnification Commitment Agreement, (Form 2202A) *may* be used to satisfy the bond and insurance requirements.
