

## Instructions for Mobility Policy Requirements

1. Review Mobility Impact Map and determine if work is in restricted or prohibit State highway Right-of-Way.
2. If the work is not located in a restricted or prohibited State highway Right-of-Way but will take more than one daylight period. Complete a mobility analysis.  
  
If the work is located in restricted or prohibited State highway Right-of-Way Access Route Time Restriction Details and determine if there are work hour restrictions
3. If work hour restrictions exist, determine if the work can be completed outside of the restrictions. The TSC Construction Permit Staff may assist in determining if this if necessary.
4. If work cannot be completed outside of the restrictions a mobility analysis shall be completed. See the MDOT Mobility Policy. A consultant may be needed to complete the mobility analysis.
5. If the mobility analysis shows a significant impact to travel time delay, volume to capacity ratio or level of service, a Transportation Management Plan shall be completed and submitted with the permit application.

Note: All work requires the submission of a Construction permit application package or 5-day Advance Notice, (Form 2205) and approval from the TSC before work is to be performed in State highway Right-of-Way.
